Betteroff Networks is firmly committed to the privacy of our clients.

We have developed the following policy to disclose the information gathering and dissemination practices for this site.

We collect certain information from clients for billing and administrative functions.

None of the information collected for these functions is provided to any outside party for any reason.

Security measures are in place to protect against loss, alteration, or misuse of data collected including the use of data encryption within our backups and shredders for our paper waste. Our fax service is electronic and faxes are only viewable by authorised staff members.

Clients are responsible for the privacy of their own account information and passwords. Our systems do not allow us to lookup active account passwords, we can only lookup the password when their account was created.

We can reset active account passwords on behalf of clients upon request in writing on company or organisation letterhead.

Suspected incidents of unauthorized use of a client account should be reported to us via email using the contact us form.

This site may contain links to resources not contained within the Betteroff Networks web site. Betteroff Networks is not responsible for the content or privacy methods of those sites.

Security Policy:

When purchasing from Betteroff Networks your financial details are passed through a secure server using the latest 128-bit SSL (secure sockets layer) encryption technology. 128-bit SSL encryption is approximated to take at least one trillion years to break and is the industry standard.
